

Enable or Disable Two Step Login

Last Modified on 09/16/2020 10:38 am MDT

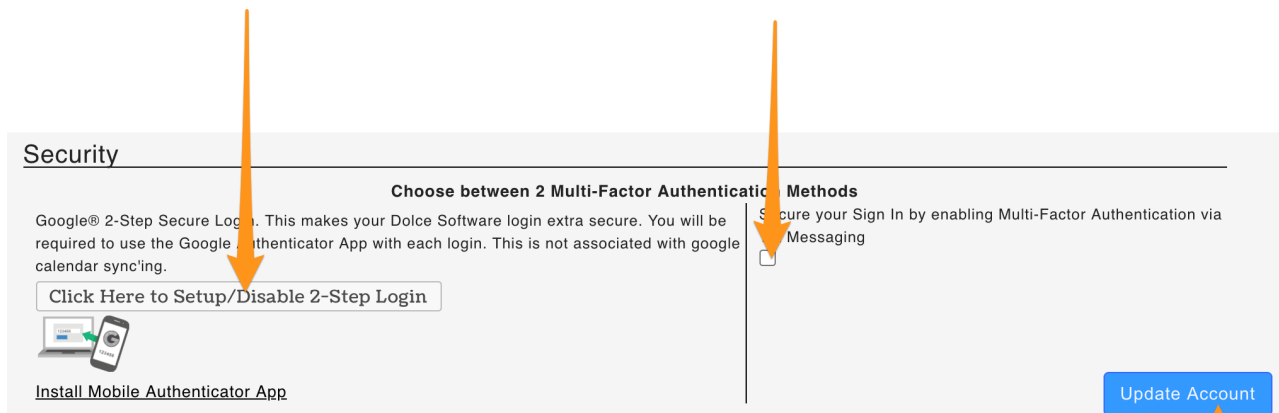

Go to employee Profile Tab

Edit Profile for Kaylie Toth

Scroll to **Security**

There are two methods available for multi-factor authentication: use either **Google** authentication or **Text** authentication. Complete by pressing **Update Account**.

To turn OFF your own Two-Step authentication, or if you are a manager, to turn off an employee's authentication, deselect the method used, and **Update Account**.

Security ** Warning MFA is ON and will effect logging in

Choose between 2 Multi-Factor Authentication Methods

Google® 2-Step Secure Login. This makes your Dolce Software login extra secure. You will be required to use the Google Authenticator App with each login. This is not associated with google calendar sync'ing.
