

Resync Employees with POS

Last Modified on 12/24/2023 10:00 am MST

Thanks to Teamwork's comprehensive integrations, in most circumstances, your employees are added to our system automatically. You have the opportunity to sync employees into Teamwork from one of our payroll integrations, or from your Point of Sale.

Teamwork will resync for new hires automatically every 15 minutes when pulling from the POS. When pulling from Payroll, we tend to resync based on actions taken in that system. However, you can always force a resync from the Employee Roster by clicking "Import Employees from POS / Payroll"

Refresh your browser.
