

Integrated Clock In for Spoton RPOS – Turning On or Off

Last Modified on 12/20/2024 9:42 am MST

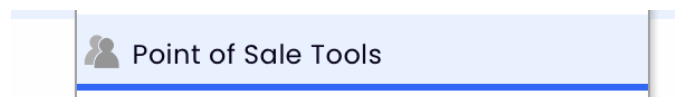

Turning On Integrated Clock-In pushes the shift in Teamwork into the POS, prompting an employee to clock-in to the correct time and role, and allows for schedule enforcement to be engaged.

See: <https://support.dolceclock.com/help/spoton-integrated-clock-in> for more detail on integrated functionality.

To Turn on Integrated (or turn off)

From the gearwheel menu select Point of Sale Tools

Next click **Enable Integrated Clock-In**

POS Tools

SpotOn (George's At Alys Beach) SYNC - SpotOn [Setup Role Mapping](#) [Reconcile Roles/Wages](#) [Enable Integrated Clock-In](#)

SpotOn (Shaka Sushi and Cocktail Bar) SYNC - SpotOn [Setup Role Mapping](#) [Reconcile Roles/Wages](#) [Enable Integrated Clock-In](#)

It is recommended to restart POS terminals when this function is engaged or disengaged.
